Forecast for Monday 26 Aug 2024

Weather: Low cloud and outbreaks of light rain and drizzle through the early hours, these continuing into the first part of the morning, but becoming largely dry as cloud starts to break up, allowing some good sunny spells into bank holiday Monday although cloud will tend to thicken once again to end the day. Staying windy, but less so than Sunday, with a freshening south-westerly breeze.

Chance of cloud-free hill tops above 800m: 30% at first, becoming 80% into the afternoon, decreasing again to 60% during the evening.

Low Cloud and visibility: Areas of cloud at first, base 500-600m, slowly lifting and breaking later in the morning to clear around lunchtime or early afternoon, although some patches perhaps lingering on the higher summits. Some patchy cloud re-forming during the evening, base 500-600m. Visibility often poor or very poor at first in drizzle or low cloud, gradually improving to be mostly good away from cloud in the afternoon, with clear views of distant hills and peaks.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Winds easing somewhat through the morning, before building again to reach near gale force on higher slopes during the late afternoon and evening, giving some difficult walking conditions. Feeling cold in the wind at the tops, despite moderate or perhaps high UV levels in afternoon sunny spells.

Forecast for Tuesday 27 Aug 2024

Weather: Cloud thickening through the early hours, with rain arriving from the northwest during the late morning and afternoon. Some uncertainty as to the timing of the ingress of the rain. Windy, with gales likely, especially in the northwest of the Park.

Maximum wind: Southerly 40-50 mph, gusting 55-60 mph.

Chance of cloud-free hill tops above 800m: 60% becoming 30%.

Low Cloud and visibility: Areas of cloud, base 500-600m, overnight then lifting a little through the morning. Cloud then becoming more widespread from late morning, base 400-600m, but more especially in the northwest of the Park. Cloud will likely be less widespread with slightly higher bases in the southeast. Visibility good away from cloud and rain, but moderate to very poor in rain and low cloud.

Temperature: **Valleys:** Plus 10C, becoming plus 17C.
At 800m: Plus 11C.
Freezing level: Above the summits.
